

BlueSea

The First Watch Wallet for Cardano

Ho Chi Minh City, 12/07/2022

Twitter: <https://twitter.com/BlueSeaHQ>

What is BlueSea?

BlueSea is a watch wallet on top of Blockfrost API and helps expand applications on Blockfrost.

Besides that, we open a watch UI kit, contributing to the development of UI components for Blockfrost.

Watch wallet improve user experiment, easy access anytime and anywhere. Realtime update pricing for your Cardano tokens helps you easily manage your balance.

Checking epoch time, and manage your staking with the watch app.

BlueSea is a non-custodial wallet, your key is your money

Easily check Cardano news with BlueSea

Get notifications with any change in your account

Easily view your NFTs art and set it as watch face

Our Approach

Lack of crypto wallet in the watch app

Demand for Global Smartwatch Market Size & Share Worth USD 97.52 Billion by 2028, Exhibit a CAGR of 21.5% Growth

With a watch wallet easy access anywhere, and anytime

Easy get payments with retails, will bring Cardano to real-life

For more security and safety, we can create a cold wallet in the watch app

Key Features

Cardano Portfolio

Manage tokens and Cardano in BlueSea, see your total balance for both Ada and tokens in Cardano blockchain and prices from Dex partners like MinSwap, MuesliSwap, etc. Users can compare and find the best prices in Cardano Dex.

Stake to Earn

BlueSea supports staking with pools in Cardano blockchain with APY is 3.5-4.5% and rewards re-staked automatically, can view data of pools as Saturation, ROA, Live Stake, Margin, Fixed Cost

Supports list pools have ISPO programs so, users can choose their for ISPO

NFT Gallery

Visually manage and send your NFTs in bulk. Can see the base price of your NFTs from the marketplace like jpg.store, cardahub.io Set your NFTs as watch face

Decentralized Exchange

Integrate with Cardano Dex Dapps to support apps swap like MinSwap, Wingriders. So we can help users easily swap and trade tokens, without a phone and can swap anytime, anywhere.

Key Features

Import Wallet

Support import your existing crypto wallet in under 30 seconds

Watch-only

Watch-only wallets allow you to keep an eye on your cold storage or paper wallet without touching your private key. Easily import your public address and watch it from your watch without moving anything.

Buy Crypto With Fiat

Support buy ADA and tokens in Cardano ecosystems with fiat, payment with your existing payment method in your watch like apple pay, google pay, Samsung pay

Our non-custodial guarantee

BlueSea doesn't track any personally identifiable information, your account addresses, or asset balances.
Complete control and full ownership of your digital assets, with no middleman, no restrictions, and total privacy.

Open source UI Kits Wallets

We open UI Kits wallet for community help building more applications on top of Blockfrost API

Roadmap

Q4 2022

- Develop logic connect with the Blockfrost API
- Programming for the user interfaces for features.
- Coding backend for the system of the App (for Cardano News and Buy ADA with fiat).
- Programming the App functions

Q2 2023

- Complete programming for the user interfaces for features.
- Deploy the BlueSea on the stores.
- Released the MVP version of the BlueSea.
- Test and check the quality and fix bugs of the App.
- Promote the event and let users experience the app before launch.
- Released BlueSea version 1.0
- Improve the interface and functionality of the App.

Q3 2022

- The BlueSea App user experience analysis.
- Design the functions and content of the App.
- Design and graphical user interface for BlueSea App.
- Build and set up the development environment App/
- Develop BlueSea architecture
- Install the necessary SDKs and libraries.
- Build server system of BlueSea App.

Q1 2023

- Programming for the user interface on watch.
- Launching the BlueSea App events promotion and introduction campaign.
- Released the MVP version of the BlueSea App up to Google Play Store.

Team key members

Thai Ngo

Senior frontend engineer & blockchain engineer, Cardano's fan

Experience: more than 7 years of experience with software development mobile, frontend, and mobile apps and blockchains. He also has experience with testing processes, UI UX design thinking

Dao Cuong

Practical blockchain engineer, software expert, blockchain enthusiasm

Experience: Design & develop software at all levels. Long track experiences with high volume, high availability critical mission systems.

Em Nguyen

Software expert, blockchain enthusiast.

Experience: more than 10 years of experience with design & development software, capable of implementing software at all levels, and running high-volume products.

Team key members

Son Nguyen

Product Designer

Experience: more than 8 years of UI and UX design and development of product

Hung Le Thanh

Product manager

Experience: Business owner, digital marketing, community management, data analysis. Experienced with Cardano economic model.

Tuong Nguyen

Junior full stack & blockchain engineer, rust enthusiasm

Experience: 2 years of experience with software and blockchain development

Tuan Nguyen

Junior full stack & blockchain engineer, rust enthusiasm

Experience: 2 years of experience with software and blockchain development

Vinh Doan

Junior full stack & blockchain engineer, rust enthusiasm

Experience: 2 years of experience with software and blockchain development

Tri Nguyen

Junior full stack & blockchain engineer, rust enthusiasm

Experience: 2 years of experience with software and blockchain development
