

Decentralized Social Intelligence

The Mainline DAO owns a patent pending SaaS platform that uncovers the authenticity and virality of activity across social networks.

Token Marketplace.

Holders of our native MAIN token participate in a data marketplace where they generate and sell data assets to both fiat and crypto users of the platform.

Buyers

The buyers access real-time streams of topics, authenticity audits of activity, and other data assets.

Data Assets

Streams

Maps

Modes

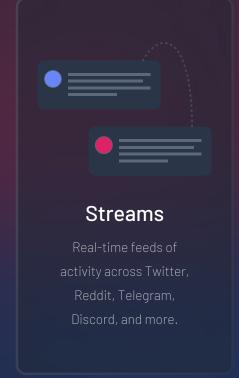

Audits

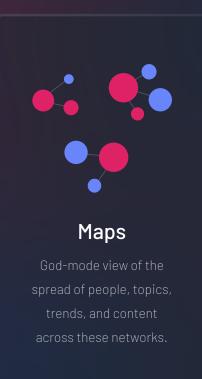

Sellers

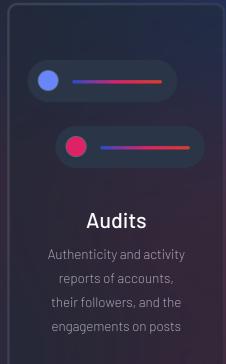

The sellers speculate on which assets will be most valuable and earn every time a buyer pays to access them.

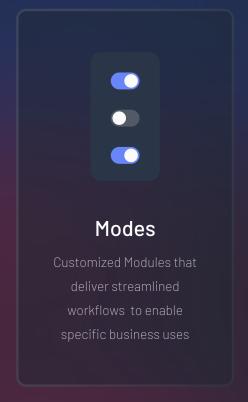

Data Assets

Data assets enable both fiat and crypto businesses of all stripes to discover authentic perceptions, target engaged audiences, shape emerging trends, and capitalize on viral conversations

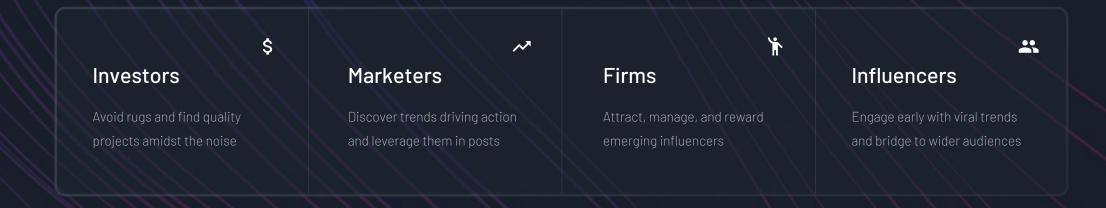

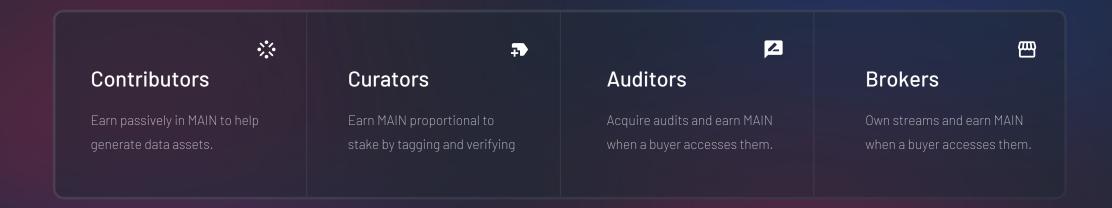

Buyer Benefits

The buyers get a god-mode view of what's happening in their industry and the tools to discover and influence trends that drive business value.

Seller Roles

The Sellers participate in the variety of steps to deliver data assets to the buyers, from passive collection to speculating on which assets will drive the most revenue.

Why Token?

The DAO uses the token to prioritize data collection, process and contextualize it quickly, offer a free tier that doesn't require ads, and create a sustainable open ecosystem not reliant on centralized infrastructure.

Prioritize Collection

Introduce market forces to drive collection of the most valuable data

Distribute Compute

Increase throughput of data by incentivizing the collection process across many nodes.

Drive HUMINT

Improve data quality by incentivizing community labelling and tagging

Decentralize Benefit

Create a public platform not reliant on centralized infrastructure or the ad model.

Where paid users discover & consume data assets across a variety of views

Search

Find trends across multiple social networks simultaneously.

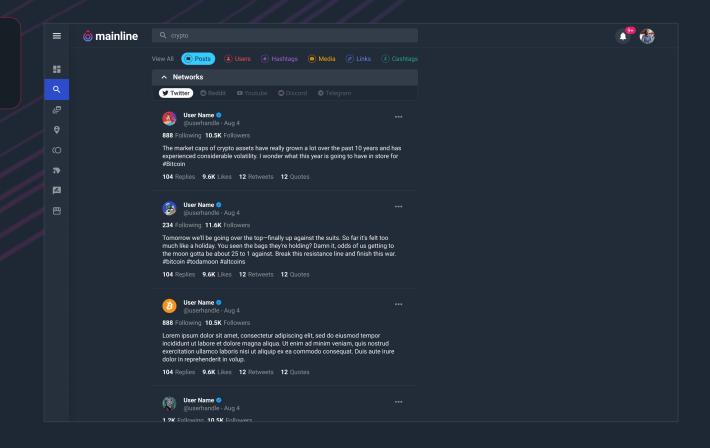

Feed

Track the top trends and users across topic streams.

Maps

Visualize the virality of users and the breadth of influence.

Profiles

Where paid users discover & consume data assets across a variety of views

Search

Find trends across multiple social networks simultaneously.

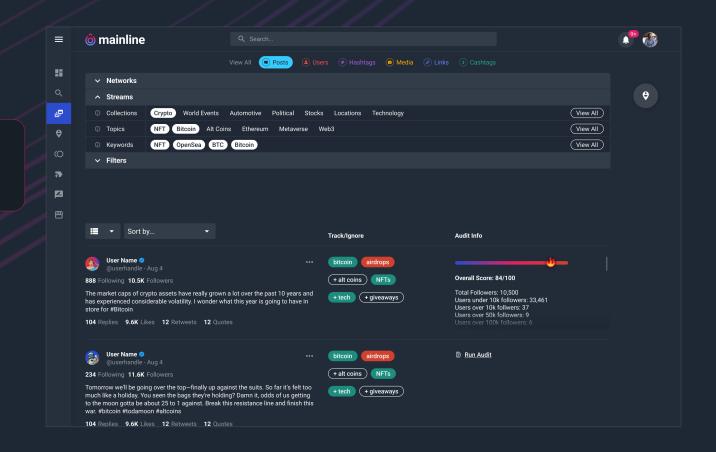

Feed

Track the top trends and users across topic streams.

Maps

Visualize the virality of users and the breadth of influence.

Profiles

Mainline DApps

Where token holders contribute to the DAO and acquire data assets.

Stake

Join in on governance and earn passively as the platform grows.

Curate

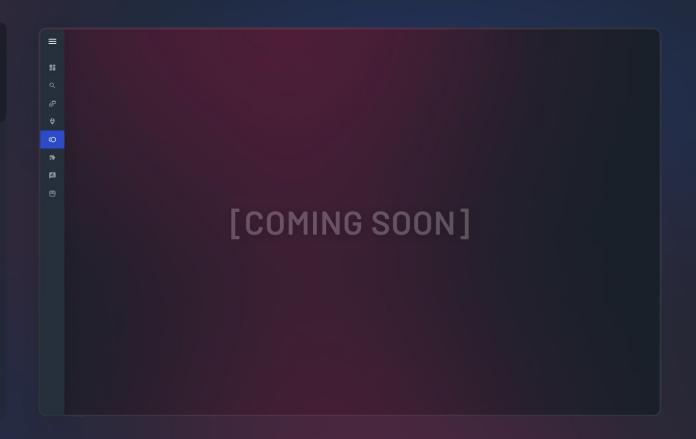

Tag and label for rewards based on stake

Audit

Acquire audits. Discover emerging voices

Broker

Open and trade streams. Monitor topic trends

Get Mainline

Make a free account to create a personalized, real-time feed across any publicly hosted stream. Earn MAIN to help grow the database.

Stake MAIN to become a DAO member and get rewarded for curation and earn when other users access data assets you own.

No Stake

- Search and Feed tabs
- Earn MAIN to process audit results
- Earn MAIN to add social accounts

Any Stake

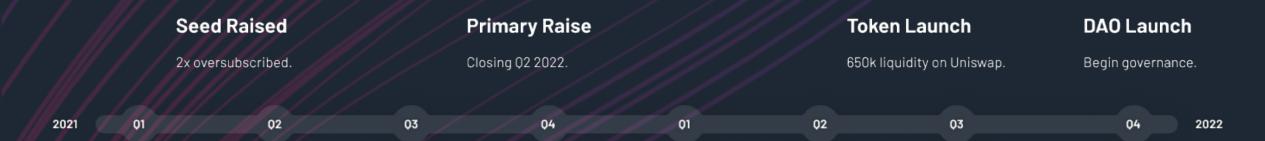

- Earn 2.5% on global transactions
- Curate for rewards
- Participate in DAO governance

Stake \$1000 in MAIN

- Use MAIN to acquire data assets
- Earn \$15/data lot on audits*
- Earn \$30/data lot on streams*

*Data lot = 1,000,000 data points. Data points are users and posts collected through audits & streams and accessed by buyers.

Roadmap

Needs Confirmed

Mainline emerged from a strategic branding consultancy.

V1 Closed Beta

Marketers and crypto analysts.

V2 Open Beta

Workflow optimization and user testing.

V3 Platform Launch

Run audits, open streams, and create custom maps.

DAO Production Schedule

On DAO Launch, voting can begin on which items get prioritized. DAO members can contribute to technical delivery and earn MAIN

	Backlog	To-Do	In Progress	Done
Token	Curator Dapp	Contributor Rewards	Staking Rewards	Token Contract
	Auditor Dapp			
	Broker Dapp			
	Mode NFTs			
	CEX Launch			
Platform	Integrations	Evangelist Mode	Follower Audits	Explore Mode
	Reporting	Follower Attribution	Retweet Audits	Maps
	Dashboards	Engagement Audits	Dynamic Maps	Search
	Browser Extension			Feed
